CHIROPRACTIC AND THE INTEGRATION OF NERVOUS SYSTEM COMMUNICATION

Stephan Ediss, DC, PAK, FIACA

Dr. Ediss encompasses a thorough review and understanding of how the central nervous system, peripheral nervous system, and the vagus nerve work together like hard drive and software to maintain life, health, mobility, as well as modulate pain, inflammation and autoimmune activity.

.....

This class will include full notes with demonstrations for various assessment procedures for adjusting, IRT (Injury Recall Technique), DTR-R (Deep Tendon Reflex-Reset technique) and nutritional assessment techniques. He will also demonstrate how to incorporate acupuncture meridian treatment, cranial manipulation, as well as the ramifications, assessment and treatment of TMJ dysfunction and much more.
