

Practical Functional Methylation

The Functional Methylation Technique begins with teaching a deep understanding of the methylation cycle. From there, practitioners will understand how to add supplemental support tailored to each clients unique genetic makeup and how to distinguish biochemistry changes. Learning how to confidently support biochemistry with nutrition and observe the effects is a key pillar of the technique.

SEPTEMBER 16 & 17, 2023
BELLEVUE, WA

- *Incorporate immediately into your practice*
- *Easy questionnaires*
- *Teaching tools to master methylation*

Jared Allomong, DC

I am the founder and owner of the Functional Health Center. I am also the creator of Functional Methylation, a technique designed to assess and address our genetic individuality and its effect on the daily processes that run our amazing bodies. Optimizing familial genetic patterns with nutrition and lifestyle is a game changer in aiding long-term health and preventing or supporting chronic illness. I am blessed to be able to teach this technique to other clinicians throughout the country.

Class Agenda:

1st Half Foundations of Functional Methylation Technique

- Functional Methylation Technique Training
- Exploring the Methylation cycle and chemistry
- Understand the nature of genetic SNPs and how they impact chemistry
- Learning Symptoms patterns

2nd Half Advanced Functional Methylation Training

- Applying the Functional Methylation Kinesiology technique
- Advanced Methylation Test Kit and the Food Peptide and Lectin Kit
- Exploring factors that affect genetic expression and Methylation
- Deeper education on Hormones, Neurochemistry, Blood chemical marker, and Digestive health
- Exploring food sensitivities and food peptide and lectin reactions

**If you're ready to take your practice to the next level,
this technique is for you!!**

Hilton Bellevue

300 112th Avenue SE
Bellevue, WA 98004
